

LAFAT kamin 30

KAMIN NA PELET / PELLET STOVE

KAMIN NA PELET

Kamini na pelet snage 30 kW nastali u pogonu Lafat proizvodnje su odgovor na sve veću potražnju korisnika za većim snagama kaminskih verzija koji koriste isključivo drveni pelet za zagrijavanje što poslovnih što rezidentalnih prostora. Savršena kombinacija dizajna i kvalitete pokrivaju veliku snagu zagrijavanja kontrolisanu inteligentnom elektronskom tehnologijom sa potpunim automatizovanim radom u svrhu što većeg komfora i uslova života uopšte. Kamin osim standardnog rada na osnovu zadate temperature vode na samom kaminu, posjeduje i opciju priključka sobnog termostata za bolju kontrolu temperature prostora zagrijavanja. Standardni sedmični tajmer dostupan na samom kaminu, korisniku daje opciju programiranog rada kamina tokom sedmice i zadate temperature vode, ukoliko korisnik ne koristi dodatnu opciju ugradnje sobnog termostata.

Sastavni dijelovi kamina na pelet 30 kW cine:

- Vodena pumpa,
- Ekspanziona posuda,
- Sigurnosni ventil.

Neupitan kvalitet izrade bilo kojeg proizvoda proizvedenih u Lafat pogonima kao i samo jednostavno održavanje kao bitan segment za svakog korisnika i ovaj proizvod dovodi u sami vrh trenutne tržišne ponude.

LAFAT kamin 30

Kamin na pelet / Pellet stove

Naziv Name	Jedinica mjere Unit of measure	KAMIN 30 PELLET STOVE 30
Opseg izlazne snage min/nom Heat output range min/nom	kW	9-30
Dimenzije: Širina / Dubina / Visina Dimensions: Width / Depth / Height	mm	635x810x1180
Promjer dimnjače Diameter of flue	mm	80
Grejna površina Heating surface	m ²	220
Težina Weight	kg	216
Stepen iskorištenja Degree of utilization	%	91,9
Snaga zračenja Radiation power	kW	6,00
Snaga prenesena u vodu Power transmitted to water	kW	24,00
Količina vode u sistemu Amount of water in the system	l	55
min / max - Potrošnja peleta min / max - Consumption of pellets	kg/h	2,1 - 6,2
max. Dužina rada sa punim spremnikom max. Length of operation with full tank	h	26
min. Dužina rada sa punim spremnikom min. Length of operation with full tank	h	8,8
Kapacitet spremnika Pellet tank capacity	kg	55
Polazni i povratni vod Hot and return line	col	1"

*U kamin ugrađena je cirkulaciona pumpa, ekspanziona posuda i sigurnosni ventil
*The stove is equipped with a circulation pump, an expansion tank and a safety valve

PELLET STOVE

The 30 kW pellet stove created in the Lafat production plant are a response to the growing demand of users for higher power stove versions that use exclusively wood pellets to heat both business and residential premises. The perfect combination of design and quality cover the great heating power controlled by intelligent electronic technology with fully automated operation for the purpose of greater comfort and living conditions in general. In addition to the standard operation based on the set water temperature on the stove, the stove also has the option of connecting a room thermostat for better control of the temperature of the heating space. The standard weekly timer available on the stove itself, gives the user the option of programmed operation of the stove during the week and the set water temperature if the user does not use the additional option of installing a room thermostat.

Included components of a 30 kW pellet stove are:

- Water pump,
- Expansion vessel,
- Safety valve.

Unquestionable quality of production of any product manufactured in Lafat plants as well as simple maintenance as an important segment for every user and this product brings to the very top of the current market offer.
