KAMIN NA PELET / PELLET STOVE

KAMIN NA PELET

Proizvod predstavlja uređaj namjenjen za zagrijavanje ambijenta čije je pogonsko gorivo isključivo DRVENI PELET.

Toplota dobijena sagorijevanjem peleta prenosi se pomoću tečnog fluida u sistem radijatorskog ili podnog grijanja. Svojim specifičnim dizajnom omogućava ugradnju u životni prostor čovjeka.

PELLET STOVE

The product is a device designed to heat an environment whose fuel is exclusively WOODEN PELLETS.

The heat generated by the pellet combustion is transferred by liquid fluid to a radiator or underfloor heating system. With its specific design, it allows installation in the living space.
